# Helavani Dzianis

## Software Developer

## Experience

### Japan Tobacco International

Software Developer (08.2020 – 01.2021)

Automatization of internal processes for Eastern Europe Region departments with Office 365, PowerBI and SharePoint.
- Developed web and mobile applications for 1000+ active users.

### StartUp <Auschooltation>

Frontend Developer (01.2020 – 09.2021)

Development and optimization of UI/UX design, creation of animations with React framework, Bootstrap and CSS3.
- The startup won an international medical competition
- The system was successfully implemented in the Belarusian Medical State University.

## Projects

### "Auschooltation" web-application

Web-app with implemented authorization system for medical students and tutors based on Django, PostgreSQL and React on the frontend. The app is designed to teach students to identify auscultation sounds (heart and breath diseases) correctly. The App consists of theoretical lessons and quizzes for knowledge testing. Profile page shows student's progress (percentage of correct answers).

### Student Management System

Web-app with implemented authorization system for students, administration and staff which allows storing data, editing and adding all members of the university; controlling the absence of the staff and students, assigning the classes to the students and teachers, communicating via messages and sending notifications. Set on Django and MySQL with some Bootstrap on the frontend.
